

SANADRO

WHERE MARKETS BEGIN TO THINK

SANADRO is a strategic machine intelligence, designed to detect the birth of market movement, align with institutional flows, and execute in perfect synchrony with global liquidity.

SANADRO redefines how markets are understood and navigated.

Welcome to the future of financial intelligence.

The Rules Have Changed

Today's markets move at the speed of machines — driven by real-time liquidity and institutional algorithms.

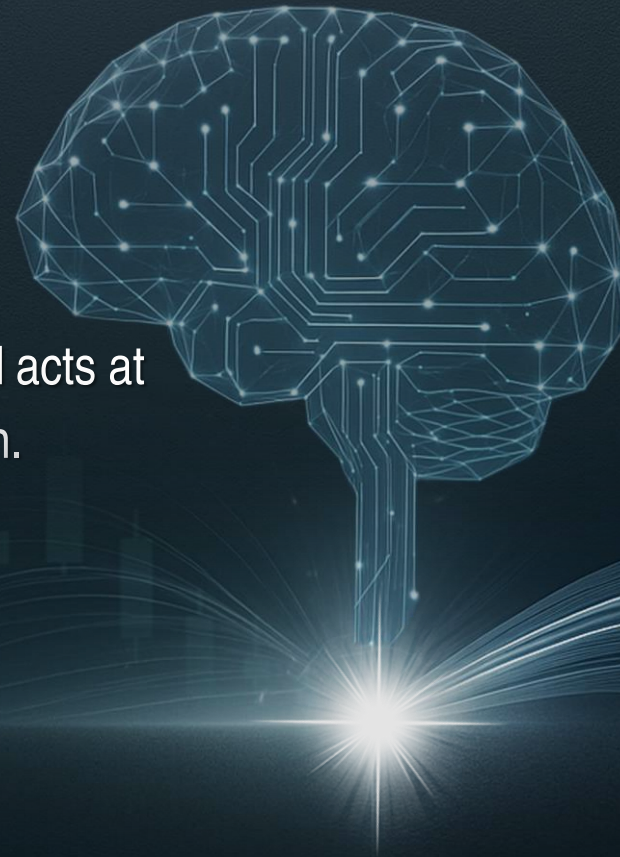

Human analysis can't keep up.

SANADRO is built for this new landscape:

a system that senses power, tracks flow, and acts at the inception of movement — before it's seen.

Markets don't need more indicators.

They need intelligence.

Too Much Data. Too Little Insight

Markets are flooded with data, yet decisions remain reactive and delayed.

Most platforms see price — but miss what moves it.

They can't detect hidden liquidity, decode institutional behavior,
or anticipate psychological shifts.

The result?

- **Missed entries.**
- **Misjudged risks.**
- **Wasted capital.**

The system isn't inefficient.

It's fundamentally blind.

Anticipation, Not Reaction

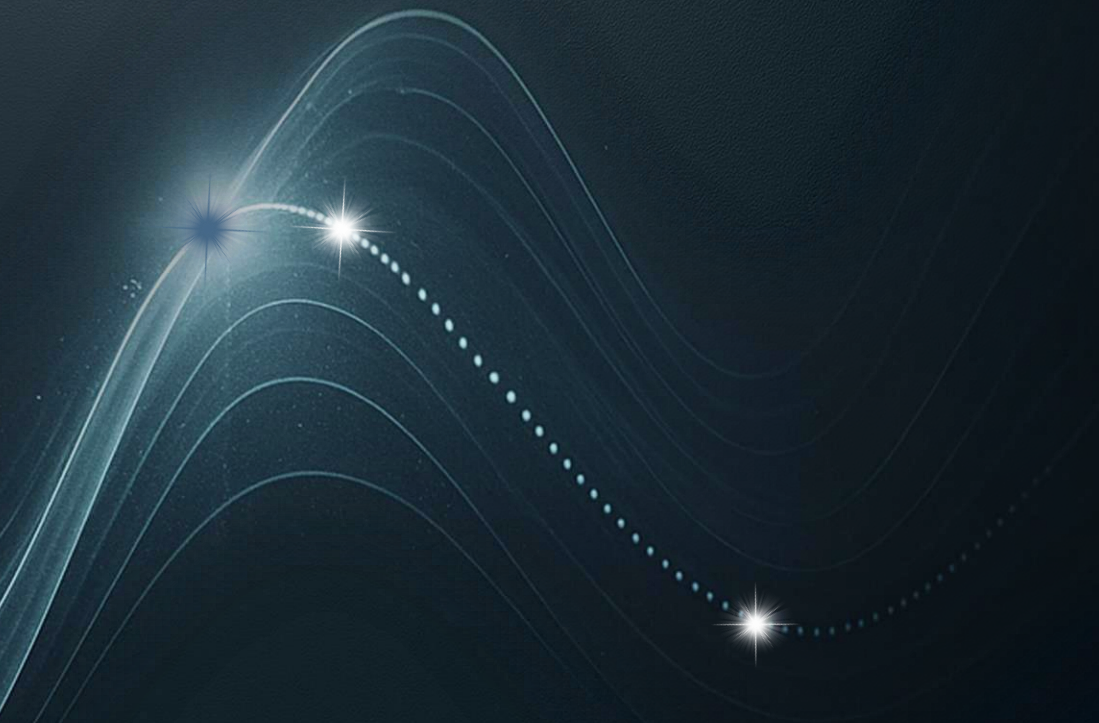

SANADRO isn't a tool — it's a thinking system.

With a multi-layered AI engine, it maps hidden liquidity across timeframes, simulates institutional behavior, and reshapes its strategy in real time.

It doesn't react to market moves — it detects them before they happen.

SANADRO sees what others miss —

before it appears.

Seeing the Full Lifecycle of Market Moves

SANADRO identifies both the beginning and end of major price movements — before they become visible.

It uses cross-timeframe liquidity mapping, institutional behavior modeling, and a reinforcement engine that evolves with market flow.

Strategies are tailored to each user's rhythm, mindset, and goals.

In tests, SANADRO's strategy consistently anticipated institutional moves ahead of visible price shifts — from hours in low timeframes to several days on higher ones.

**It doesn't just adapt to markets —
It adapts to you.**

A DIFFERENT SPECIES OF INTELLIGENCE

SANADRO is fully autonomous — it senses liquidity shifts, aligns with institutional momentum, and executes with precision.

No lag. No noise. No guesswork.

It thrives in all conditions: volatile or stable, trending or sideways.

In market simulations, it consistently entered within minutes of institutional flow — precisely when volatility was about to expand.

Not smarter.

Smarter by design.

PROOF OF CONCEPT — AND SCALABILITY

In a 12-month test across 10 assets, a **\$100K margin account** reached **\$1.55M profit** with just 1.25% average drawdown.

Built on a basic MQL4 prototype — no AI, no risk engine.

5-year EUR/USD back tests confirmed the same edge.

This is less than 10% of SANADRO's full architecture.

A glimpse of potential , and a blueprint for exponential scale.

THE MARKET HAS SHIFTED — SANADRO MOVES FIRST

Algorithmic trading is now.

92% of Forex volume is already automated.

By 2030, the market will top \$33.5B.

SANADRO launches from Dubai — the fintech core of MENA
— and expands into Europe, Asia, and North America.

It's designed for institutions seeking edge — before the
market reacts.

For first movers —

Not followers

REGULATION ISN'T A CHECKBOX — IT'S THE FOUNDATION FOR TRUST, SCALE, AND GLOBAL ENTRY.

- ◆ Built from Day 1 with regulation in mind — not just to comply, but to accelerate institutional trust and global market access
 - ◆ Aligned with top GCC compliance frameworks
 - ◆ Fully integrated into DFSA (DIFC) & FSRA (ADGM) sandboxes — tested in real regulatory environments
 - ◆ Legal incorporation planned in IFZA or DIFC Innovation Hub — fintech-dedicated zones with global recognition
 - ◆ Structured through success-based partnerships with UAE's leading legal firms
- 🔒 Compliance-Ready: AML • KYC • Data Privacy • Investor Safeguards

Trusted by institutions. Approved by regulators.
Designed for global legal scale.

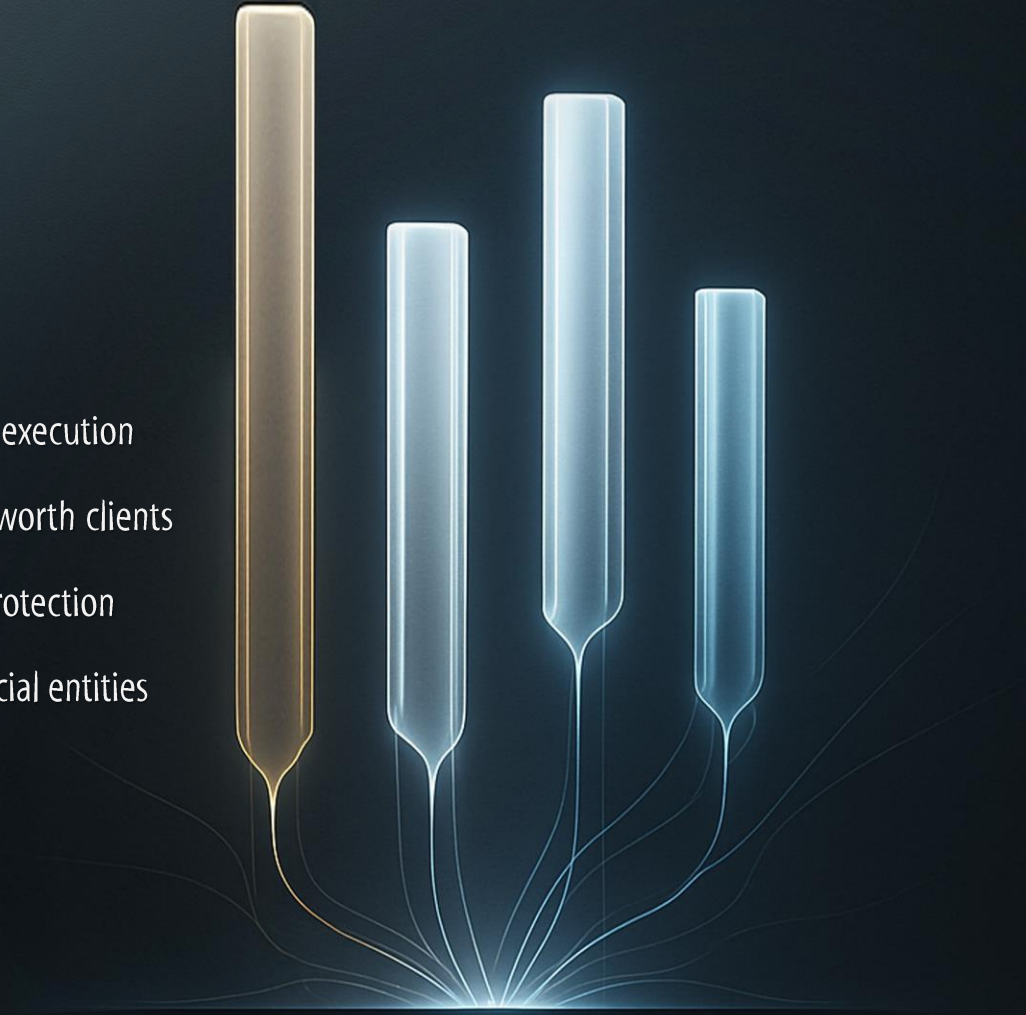

A strategic revenue engine.

SANADRO is built on four synergistic income streams:

1. Internal Capital Growth — Trading SANADRO's own capital with system-driven execution
2. VIP Portfolio Management — Personalized investment strategies for high-net-worth clients
3. Retail & Pro Subscriptions — Tiered access to analytics, automation & capital protection
4. B2B APIs & Intelligence — Institutional data, signals, and integrations for financial entities

One platform Four revenue engines.

Built for global financial resilience.

THIS IS NOT A PROJECTION — IT'S A FLIGHT PLAN.

SANADRO's 5-year growth trajectory is engineered for momentum:

Year 1-2: Infrastructure, testing, regulatory alignment

Year 3-4: Revenue inflection through VIP & B2B onboarding

By Year 5:

- \$715M net profit
- ROI: 2944%

These results aren't hypothetical —

they reflect a system built for scale,
performance, and financial durability.

FROM VISION TO EXECUTION — A FOUNDER-LED JOURNEY

◆ Ali Rezaei

Founder & Strategic Architect

Architected SANADRO from the ground up — from cognitive strategy and AI logic to institutional modeling and legal structure.

◆ Sana Abedini

Co-Founder & Chief Experience Architect

The creative mind behind SANADRO's visual identity and experiential design.

🧠 Next Phase: Precision Team Formation

To build the future of intelligent finance, SANADRO is assembling elite talent in:

- Adaptive AI Engineering
- Liquidity System Design
- Institutional Strategy Architecture
- Behavioral UX & Market Experience

We're not just building a team —

We're engineering the core of intelligent market infrastructure.

JOIN THE STRATEGIC PRE-SEED ROUND

We're raising \$1.8M in smart capital

- ◆ To finalize our MVP
- ◆ Activate regulatory onboarding
- ◆ Lay the groundwork for a strategic Seed round

We're inviting a select group of strategic minds —

To co-design the future of SANADRO,

Not just as investors, but as early partners in intelligence.

→ This is not a pitch. It's the beginning of a transformation.
